

# CTERA Virtual Gateway (Edge Filer) Configurations

The following table outlines the available virtual gateway licenses and configurations.

| License | Maximum Storage | RAM  | vCPUs | Network | Maximum Users* |
|---------|-----------------|------|-------|---------|----------------|
| EV8     | 8TB             | 4GB  | 2     | 2Gb     | 250            |
| EV16    | 16TB            | 8GB  | 4     | 2Gb     | 1000           |
| EV32    | 32TB            | 16GB | 8     | 2Gb     | 2000           |
| EV64    | 64TB            | 32GB | 16    | 4Gb     | 5000           |

\* The number of clients mounting a share on the gateway, assuming less users are reading and writing to the gateway at a given point in time. The number of concurrent users will be less than this maximum figure.
